

Prefabricated Ligament Knee Brace

Whether you brace post-surgically, conservatively or for contact sports, your patients need a knee brace that protects their ligaments. But they want a brace that is comfortable, doesn't slide down their leg, and doesn't impede their motion – even during full activity.

The patented Active Thigh Cuff (ATC) is less restrictive than rigid thigh braces, allowing full flexion of the leg.

A Breakthrough in Suspension

The new prefabricated Hawk™ ligament brace combines the benefits of rigid bracing protection with a new level of suspension and comfort.

Featuring the patented Active Thigh Cuff (ATC) system, the Hawk absorbs soft tissue profile changes during activity. This unique feature allows the brace to exert a consistent skeletal force at the thigh, providing unparalleled suspension and comfort. The strong and lightweight carbon composite shells and aerospace-grade steel hinge provide the strength and protection needed by patients with damaged, deficient or repaired ligaments.

Active Thigh Cuff (ATC) System

These photos demonstrate the action of the ATC system under various conditions (the active straps are in red)

Patient Satisfaction Guarantee

VQ OrthoCare™ guarantees that the Hawk™ brace will provide improved comfort and suspension for your patients. If your patient is not satisfied, please return the brace to VQ OrthoCare within the first 30 days of patient delivery for a full refund.

To obtain prescription forms or order a Hawk brace, please contact your dedicated VQ OrthoCare Representative or call 800.266.6969.
