

ULTRASLING® II / ULTRASLING II AB

Both versions of the UltraSling® II provide immobilization for rotator cuff repairs, capsular shifts, Bankhart repairs, glenohumeral dislocation/subluxation, and soft tissue repairs/strains.

UltraSling II

Shoulder Immobilizer with Abduction Pillow

- Breathable, extra-padded fabric for greater comfort, particularly in longer-term use
- Encourages effective healing by allowing the shoulder and arm to remain in a neutral position
- Helps prevent post-operative internal rotation contractures that can occur in a sling.
- Promotes auxiliary air exchange to reduce risk of secondary infections
- Exercise ball stimulates circulation.
- Easy-open front panel encourages forearm exercises
- Allows arm to be positioned in a variety of positions dependent on post-operative requirements (either more posterior or anterior)
- AB version: large, comfortable pillow gives greater abduction where required (45 or 60 degrees)
